IV- Reading comprehension. (2.5 PTS)

A. Choose the best answers to complete the passage below.

We are all slowly destroying the earth. The seas and rivers (1) _____ too dirty to swim in. There is so much smoke (2) _____ the air that it is unhealthy to live in many of the world’s cities. In one well-known city, for example, poisonous gases from cars pollute the air so much that traffic policemen have to wear oxygen masks. We have cut down (3) _____ trees that there are now vast areas of wasteland all over the world. As a result, farmers in parts of Africa cannot grow enough to eat. In certain countries in Asia, there is too little rice. Moreover, we (4) _____ take care of the countryside.

Wild animals are quickly disappearing. For instance, tigers are rare in India now because we have killed too many of them. However, it isn’t enough simply to talk about the problem. We must (5) _____ now before it is too late to do anything about it. Join us now. Save the Earth!

B. Read the following passage, and answer the questions that follow

Two of the most dangerous storms which affect America are hurricanes and tornadoes. They are very much feared by anyone who may live in the path of their destruction. Every year homes are destroyed by their fury and often lives are lost. Most people who live near the coast are forced to evacuate their homes and to move to safer areas until the storm passes. Floods are caused along the coasts by both the heavy rain and a storm tide that is considerably above normal water level. The high winds, coastal flooding and heavy rains associated with a hurricane cause enormous damage.

Hurricanes usually develop between July and October. Once they hit land they carry tremendous power with driving rain and wind. Tornadoes are violent low-pressured storms. These storms occur most often during the summer months and are noticeable by their strong wind and lack of rain. The sky turns black as dust is sucked up into the air. Tornadoes are capable of lifting quite heavy objects from the ground. **They** can pick up trees and cars right into the air and even uplift heavier objects such as homes and railway cars. Both hurricanes and tornadoes cause millions of dollars worth of damage to life and property every year. Today they can be predicted more easily than in the past, but they cannot be stopped or ignored.
