Our planet is a fantastic place, and it's essential to take care of it. There are simple things we can do to protect the environment. One of them is using both sides of the paper when drawing or writing. This way, we save trees and reduce the amount of paper we use. Another way to help is by picking up trash we see on the ground and throwing it in the proper bin. When we litter, it harms animals and plants. So, always remember to use the trash cans. Using water wisely is crucial, too. We should turn off the tap tightly to stop dripping and not waste water. It's also a good idea to take shorter showers. Using energy is part of our daily life, but we can be mindful of how we do it. Turning off the lights when we leave a room and asking grown-ups to turn off appliances when they're not using them saves electricity and helps the planet. Lastly, let's remember that plants are essential for the environment. They give us fresh air to breathe. Planting flowers, trees, or even a small vegetable garden can make a big difference in keeping our Earth healthy. Remember, we all share this beautiful planet, and by taking care of it, we can make it an even better place for everyone!

@ True or False?
