4. A. pollute B. polluted C. polluting D. pollution
5. A. difficultly B. more difficult C. most difficult D. as difficult

II. Read the passage carefully and then do the tasks followed. (1,25 pts)

Solar energy is a long lasting source of energy which can be used almost anywhere. To generate solar energy, we only need solar cells and the sun! Solar cells can easily be installed on house roofs, so no new space is needed and each user can quietly generate their own energy. Compared to other renewable sources, they also possess many advantages. Wind and water power rely on turbines which are noisy, expensive and easy to break down. Solar cells are totally silent and non-polluting. As they have no moving parts, they require little maintenance and have a long lifetime.

However, solar energy also has some disadvantages. We can only generate solar energy during daytime because the system depends on sunlight. Besides, solar cells require large area to work effectively. The main disadvantage of solar energy is that it costs about twice as much as traditional sources such as coal, oil, and gas. This is because solar cells are expensive. Scientists are hoping that the costs of solar cells will reduce as more and more people see the **advantages** of this environmentally friendly source of energy.

1. What are needed to generate solar energy ?

-
2. Where can solar cell be installed ?
.....
3. What are the disadvantages of wind and water power?
.....
4. Which of the following is the main disadvantage of solar energy mentioned in the passage?
A. It is expensive.
B. Solar cells require large areas to operate.
C. It is unfriendly to the environment.
D. It depends on sunlight.
5. The word "**advantages**" is closest in meaning to _____.
A. very bad. B. resources C. benefits D. friendly

PART C: WRITING (2,5 POINT)

I. Complete the second sentence so that it has a similar meaning to the first one. (1.5 pts)

1. My father often played tennis very actively five years ago .
→ My father used.....
