V. Read the passage and mark the letter A, B, C or D to indicate the best answer to each of the following questions from 25 to 32. (2 pts)

Global warming is a serious problem that affects everyone on our planet. It happens because people burn fossil fuels such as coal and oil. When these fuels are burned, they create greenhouse gases, which **trap** heat in the atmosphere. As a result, the temperature of the Earth is rising. If this continues, many animals and plants may die out, and some natural resources may **run out** sooner than we expect.

Another problem is pollution from factories, cars, and plastic waste. Some companies may even need to close down if they use up too many resources or damage the environment too badly. In order to combat climate change, countries need to work together and make better choices. One important step is to use energy from renewable sources like wind, solar, and water power. **They** do not cause as much pollution, and help to reduce carbon emissions.

However, governments are not the only ones who can make a difference. Ordinary people can also help by making small changes in their daily lives. You can alter your behavior by choosing to walk or cycle instead of driving. You can also recycle paper, plastic, and glass instead of throwing them away. **When many people take small actions, the result can be very powerful.**

If we work together and change our habits, we can protect the planet, help animals and plants survive, and build a healthier future for the next generation.

25. The word “**run out**” in paragraph 1 is **CLOSEST** in meaning to _____.
A. become safer B. grow quickly C. appear suddenly D. be used completely
26. The word “**trap**” in paragraph 1 is **OPPOSITE** in meaning to _____.
A. let something escape B. store something safely
C. keep something under control D. hide something from view
27. According to the passage, which energy sources help reduce carbon emissions?
A. Nuclear and coal B. Wind, solar, and water C. Oil and gas D. Plastic and steel
28. In which paragraph does the author explain actions that normal people can take to help the environment?
A. Paragraph 1 B. Paragraph 2 C. Paragraph 3 D. Paragraph 4
29. The word “**they**” in paragraph 2 refers to _____.
A. cars and factories B. countries
C. renewable energy sources D. carbon emissions
30. Which of the following is **NOT TRUE** according to the passage?
A. Raising public awareness about recycling can lead to less waste.
B. Governments alone are responsible for solving climate change.
C. Higher temperatures may put several species at risk of extinction.
D. Some businesses may close down if they carry on misusing resources.
31. Which of the following best paraphrases the underlined sentence in paragraph 3?
A. A large number of small efforts can create a strong impact.
B. Small actions by individuals are useless.
C. People should not take responsibility for the environment.
D. Only big changes can combat climate change.
32. What is the main idea of the passage?
A. Why renewable energy is more reliable than fossil fuels.
B. The consequences of global warming and possible human responses.
C. A comparison between different sources of greenhouse gases.
D. The economic benefits of investing in green technology.

II. Read the passage and mark the letter A, B, C or D to indicate the best answer to each of the following questions from 5 to 12. (2 pts)

Global warming is a serious problem that affects everyone on our planet. It happens because people burn fossil fuels such as coal and oil. When these fuels are burned, they create greenhouse gases, which **trap** heat in the atmosphere. As a result, the temperature of the Earth is rising. If this continues, many animals and plants may die out, and some natural resources may **run out** sooner than we expect.

Another problem is pollution from factories, cars, and plastic waste. Some companies may even need to close down if they use up too many resources or damage the environment too badly. In order to combat climate change, countries need to work together and make better choices. One important step is to use energy from renewable sources like wind, solar, and water power. **They** do not cause as much pollution, and help to reduce carbon emissions.

However, governments are not the only ones who can make a difference. Ordinary people can also help by making small changes in their daily lives. You can alter your behavior by choosing to walk or cycle instead of driving. You can also recycle paper, plastic, and glass instead of throwing them away. **When many people take small actions, the result can be very powerful.**

If we work together and change our habits, we can protect the planet, help animals and plants survive, and build a healthier future for the next generation.

- Which of the following best paraphrases the underlined sentence in paragraph 3?
