JOIN THE FIGHT: PROTECTING VIETNAM'S WILDLIFE WITH ENV!

Education for Nature Vietnam (ENV) is a Vietnamese non-governmental organisation. It was set up in 2000 by a group of young Vietnamese people. It **(7)** _____ to stop the illegal wildlife

C. Global warming in the future.

Read the following passage and choose the correct answer to each of the questions (1,25 pts)

Plastic **pollution** in our oceans is a major issue that has serious effects on marine ecosystems and wildlife. These days, more and more people are considering reducing the amount of plastic they use, but what about the rubbish that is already in the oceans? In some parts of the world, it forms floating islands of plastic. The largest of these is the Great Pacific Garbage Patch between North America and Japan. It's three times the size of France!

Now, however, one amazing teenager called Boyan Slat has invented a machine, System 001/B, **which** catches ocean rubbish. It is a huge 600-metre floating barrier of pipes. A net hangs down from the pipes and reaches three metres below the surface of the water. Boyan avoided using fuel in System 001/B, so it has a very low carbon footprint. It uses the ocean currents and wind to move through the water. Ships take away the waste every six to eight weeks.

But how did Boyan do this? He started telling people about his idea on the Internet and asking for help. Eventually, he raised £1.57 million! He also set up a charity called Ocean Cleanup, which now has over 80 engineers, scientists and environmental experts who are all working to change the planet for good.

Boyan shows us that we can make a difference and help protect the planet, no matter how big the problem is. With hard work, fundraising and a good idea, it's never too late to help Planet Earth!

Question 18. What is the main idea for this passage?

Climate change is one of the most intuitive changes in global warming. As a result of a large amount of carbon dioxide emissions, there is a sharp rise in high-temperature weather, which has an irreversible impact on our environment and ecology. Scientists say, "Changing weather patterns linked to rising global temperatures have resulted in a dearth of wind across northern China, according to several recent studies, **exacerbating** a wave of severe pollution that has been blamed for millions of premature deaths". However, when I returned home last Christmas, there was no snow on the street, instead, it was a warm winter with sunshine. The continued of global warming may not only bring about changes in climate. The world may undergo more unpredictable changes due to global warming in the future.

Global climate change has seriously affected the living environment of animals, the change of climate, the quality of human life, and the threat to human security. Global warming has become a very difficult trend to reverse. **It** and rising temperatures have caused very serious consequences for human beings, brought great impact on the Earth's organisms and seriously affected people's lives, but people didn't realize the seriousness of the problem. It is urgent to protect the environment and people should take active measures to deal with it.

Question 13. According to the passage, what has caused a sharp rise in high-temperature weather?

A. Increased rainfall

C. Strong winds

Question 14. In the sentence: *"It and rising temperatures have caused very serious consequences..."*, what does **"It"** refer to?

A. Human life **B.** Global warming **C.** Environmental change **D.** Air pollution

Question 15. The word “**exacerbating**” in the passage is **closest** in meaning to:

A. Improving **B.** Reducing **C. Worsening** **D.** Ignoring

Question 16. What unusual weather did the author experience last Christmas?

A. Heavy snowfall

C. Warm weather with sunshine and no snow

Question 17. What could be the best title for the passage?

A. The Protection of the environment **B. Climate Change and Global Warming**

C. Global warming in the future.
