Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the questions.

In the near future, technology is expected to bring about significant changes to how we lead our lives. One of the most **notable** shifts will be the way we keep up with the rapid pace of technological advancements. With smart homes and autonomous vehicles, our daily routines will increasingly depend on sophisticated systems designed to make our lives easier. For example, smart assistants will look out for our needs, such as ordering groceries, adjusting room temperatures, or even scheduling doctor's appointments.

Another major development will be in communication. Today, we already use video calls to stay in touch with friends and family across the globe, but the future promises even more immersive experiences. Virtual reality could allow us to hang out with people in virtual spaces, regardless of where **they** physically are. As a result, geographical barriers will become less relevant, creating a more connected and global society.

Healthcare is also likely to transform. Advances in artificial intelligence will enable doctors to look after patients more efficiently, diagnosing diseases earlier and prescribing personalized treatments. These changes may extend our lifespan and improve our quality of life. Additionally, **breakthroughs** in renewable energy will play a key role in sustaining our future. With green energy sources, such as solar and wind power, we can cut down on harmful emissions and move toward a more sustainable planet.

While these advancements sound exciting, they also bring challenges. **As technology becomes more integrated into our lives, we must be careful to ensure privacy and security.** We need to watch out for potential risks, like data breaches and the misuse of personal information. With thoughtful planning, however, the future holds great promise for improving the way we live, work, and interact with the world.

Question 1. Which of the following is NOT mentioned as one of our needs that smart assistants will look out for in the future?

Question 4. The word "**breakthroughs**" in paragraph 3 could be best replaced by:

- A. discoveries B. experiments C. complications D. failures

Question 5. According to the passage, which of the following statements is TRUE?

- A. Privacy and security will be less important as technology advances.
B. Smart assistants will replace doctors in the future.
C. Geographical barriers will become more significant in the future.
D. Advances in healthcare may help people live longer.

Question 6. Which of the following best paraphrases the underlined sentence in paragraph 4?

- A. Technology will eventually take over privacy and security issues in our lives.
B. Privacy and security will decrease as technology advances.
C. We need to focus on privacy and security as technology plays a bigger role in our lives.
D. Privacy and security will no longer be concerns as technology advances.

Question 7. In which paragraph does the passage talk about communication in the future?

- A. Paragraph 4 B. Paragraph 2 C. Paragraph 3 D. Paragraph 1

Question 8. In which paragraph does the passage mention renewable energy sources?

- A. Paragraph 4 B. Paragraph 1 C. Paragraph 2 D. Paragraph 3

Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the option that best fits each of the numbered blanks.

Protecting Marine Life: Our Responsibility

The Ocean Crisis

Every year, thousands of sea creatures die because of plastic pollution. Marine debris and the warming of oceans are driving many fish species to the brink of (9) _____. Coral reefs, which are home to diverse marine life, are suffering from severe damage.

Taking Action

Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions.

[I] Over the past decades, the number of endangered species worldwide has been steadily increasing. This phenomenon is primarily driven by **human activities**, such as habitat destruction, poaching, and climate change. **Conservation efforts have been made to address these issues, but much more needs to be done** to protect vulnerable wildlife.

[II] One of the main threats to endangered species is habitat loss. Deforestation, urbanisation, and agricultural expansion have destroyed vast areas of natural habitats, forcing many animals to **relocate** or face extinction. Additionally, illegal hunting and the trade of endangered species for their fur, bones, and other body parts remain significant threats, despite global regulations.

[III] In response to these challenges, a variety of conservation strategies have been implemented. Protected areas such as national parks and wildlife reserves are established to conserve habitats and offer **sanctuary** to endangered species. Furthermore, stricter anti-poaching laws have been enforced in many regions to curb illegal hunting. International collaboration has also played a crucial role in the fight against wildlife trafficking.

[IV] While progress has been made, there is still much work to be done. Enhanced public awareness and education on the importance of biodiversity are essential to garner more support for wildlife conservation. Additionally, innovative technologies such as drones and satellite monitoring are helping to track animal populations and combat illegal activities. Governments, NGOs, and local communities must continue to work together to protect the most vulnerable species from extinction.
