READING 2

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the following questions.

The Rise of Online Learning

In recent years, online learning has become an increasingly popular form of education around the world. What once seemed like an alternative option is now considered a mainstream method of study. Thanks to technological advances, students can access lessons, submit assignments, and interact with teachers without being physically present in a classroom.

One major advantage of online learning is **flexibility**. Learners are able to study at their own pace and schedule, which is especially helpful for those who work part-time or live far from educational institutions. In addition, many online courses provide recorded lectures, allowing students to review difficult content as many times as necessary. **This** can significantly improve understanding and retention of knowledge.

However, online education is not without challenges. Some students struggle with self-discipline and time management, as there is no fixed timetable forcing them to attend classes. Moreover, limited face-to-face interaction may reduce opportunities to develop communication skills and teamwork abilities. Technical problems such as unstable internet connections can also **interrupt** the learning process.

Despite these drawbacks, experts believe that online learning will continue to expand. Many universities are now combining traditional classroom teaching with digital platforms, creating what is known as blended learning. This approach aims to take advantage of both methods while minimizing their weaknesses. As technology continues to develop, online education is expected to become even more effective and accessible in the future.

Question 1 Which of the following is NOT mentioned as an advantage of online learning?

- A. Students can replay recorded lectures.
- B. Learners can choose their own study schedule.
- C. Online courses are always cheaper than traditional classes.
- D. Students can submit assignments online

Question 2 The word “**interrupt**” in paragraph 3 is CLOSEST in meaning to ____.

- A. delay
- B. disturb
- C. continue
- D. improve

Question 3 The word “**flexibility**” in paragraph 2 is OPPOSITE in meaning to:

- A. adaptability
- B. freedom
- C. rigidity
- D. convenience

Question 4 The word “**This**” in paragraph 2 refers to:

- A. studying part-time
- B. reviewing recorded lectures repeatedly
- C. living far from schools
- D. submitting assignments online

Question 5 Which of the following best paraphrases the sentence:

“Some students struggle with self-discipline and time management”?

- A. Certain learners find it difficult to control themselves and organize their study time effectively.
- B. Students are forced to follow a strict timetable in online classes.
- C. Online learning improves students’ discipline significantly.
- D. All students manage their time perfectly when studying online.

Question 6. Which of the following statements is TRUE according to the passage?

- A. Online learning completely replaces traditional classroom education in most universities.
- B. All students find it easy to manage their time in online courses.
- C. Blended learning combines face-to-face teaching with digital platforms.
- D. Online education has no disadvantages thanks to technological advances.

READING 3

Read the passage and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions.

How AI is Changing Our Classrooms

Artificial Intelligence (AI) is creating useful tools for both students and teachers. One major benefit is personalized learning. AI software can look at a student's work. **It** can see which subjects are easy or hard for them. Then, it **adjusts** the learning material. For instance, it might give simpler practice to a student who is struggling. For a quick learner, it can offer more difficult tasks. This helps each person learn at the right speed and level, making education feel more personal and effective.

AI also saves teachers time on routine jobs. Marking tests and homework takes many hours. **[I]** Now, AI can quickly grade quizzes, multiple-choice questions, and exercises with single-word answers. **[II]** This automation gives teachers more free time in their week. **[III]** They can use this extra time for more valuable activities. These include planning interactive lessons or working one-on-one with students who need extra support. **[IV]** By managing these repetitive tasks, AI lets teachers focus more on mentoring and inspiring their class.

Another helpful application is the 24/7 AI tutor. These smart systems can answer student questions at any time. If a student is studying at home and doesn't understand a science concept, they can ask the AI. The AI tutor will explain it step-by-step, offering hints and examples. It is always available and patient. This constant access to help encourages students to study **independently** and clears up confusion immediately, rather than having to wait.

In summary, AI is a powerful assistant in education. It personalises learning paths, handles time-consuming grading, and provides round-the-clock academic support. The purpose is not to replace human teachers but to empower them. **With AI handling certain tasks, teachers can dedicate more energy to the human aspects of teaching** - guidance, motivation, and complex discussion. As the technology improves, its role in creating supportive and adaptive learning environments will continue to grow.

Question 1. The word "**it**" in paragraph 1 refers to _____.

- A. a student's work B. the learning material
C. AI software D. simpler practice

Question 2. The word "**adjusts**" in paragraph 1 is closest in meaning to _____.

- A. ignores B. changes C. repeats D. reads

Question 3. According to paragraph 1, what does AI software analyze to personalize learning?

- A. A student's future career plans.
B. A student's attendance record.
C. A student's work to see easy and hard subjects.
D. A student's personality and hobbies.

Question 4. Where does the following sentence best fit in paragraph 2?

"For example, it can grade a set of fifty vocabulary quizzes almost instantly." A. [I]

- B. [II] C. [III] D. [IV]

Question 5. Which of the following is **TRUE** according to paragraph 2?

- A. AI cannot grade any type of homework.
B. The time saved by AI allows teachers to plan better lessons.
C. Routine jobs like grading are the most important part of teaching.
D. AI is mainly used to replace teachers in the classroom.

Question 6. Which of the following best summarizes the main idea of paragraph 3?

- A. AI tutors are expensive to develop but very popular.
B. AI tutors are available any time to explain problems and promote independent study.
C. Human teachers are less patient than AI tutors.
D. Students should only use AI tutors for science homework.

Question 7. The word "**independently**" in paragraph 3 is OPPOSITE in meaning to _____.

- A. autonomously B. separately C. reliantly D. confidently

Question 8. Which of the following best paraphrases the underlined sentence in paragraph 4?

"With AI handling certain tasks, teachers can dedicate more energy to the human aspects of teaching."

- A. When AI manages certain tasks, educators have less time to invest in meaningful human interaction with

students.

B. Because AI takes over specific responsibilities, teachers can focus more on the personal and relational side of education.

C. By preventing AI to handle routine duties, teachers are free to prioritize the human-centered elements of learning.

D. With AI supporting administrative and repetitive work, teachers hardly devote greater attention to mentoring and connecting with their students.

Question 9. Based on the passage, what is a likely reason schools are adopting AI tools?

A. To increase the number of exams students must take.

B. To reduce the need for school buildings.

C. To make learning more efficient and supportive for each student.

D. To ensure all students learn exactly the same way at the same time.

Question 10. Which of the following is the best summary of the entire passage?

A. AI is changing education by personalizing learning, saving teachers time on grading, and acting as a 24/7 tutor, supporting better teaching and learning.

B. The main disadvantage of AI tutors is that they make students lazy and unable to think for themselves without technology.

C. Personalized learning software is the only useful AI tool, and they are gradually replacing traditional classroom teachers.
