Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions from 17 to 26.

[I] Until recently, ChatGPT was mostly restricted to generating answers from its training data, which is current up to October 2023 for GPT4.0. [II] However, the chatbot's developers has an exciting announcement that promises to change this. [III] ChatGPT can now search the Internet in response to queries about recent information such as sports, stocks, or news of the day, and can deliver rich multi- media results (pictures, videos, etc.). [IV]

While the new search feature is initially available to paying customers, OpenAI intends to make it available for free later, even when people are logged out. The company also plans to combine search with its voice features and Canvas, its interactive platform for coding and writing, although these capabilities will not be available to users in upcoming updates.

OpenAI is the latest tech company to debut an AI-powered search assistant, challenging similar tools from competitors such as Google, Microsoft, and startup Perplexity. Meta, too, is developing its own AI search engine. As with Perplexity's interface, users of ChatGPT search function can interact with the chatbot in natural language, and it will offer an AI-generated answer with sources and links to further reading. Meanwhile, Google's AI Overviews offer a short AI-generated summary at the top of the website, as well as a traditional list of links.

Despite its enhanced ability, the tool is not **free from** the tendency of AI language models to make things up or get it wrong. When some users tested the new search function and asked it for vacation destination ideas, for example, ChatGPT suggested "luxury European destinations" such as Japan, Dubai, the Caribbean islands, Bali, the Seychelles, and Thailand. It offered as a source an article which listed these locations as well as those in Europe as luxury holiday options. There is also a risk that misinformation might seep into ChatGPT's answers from the internet if the company has not filtered its sources well enough.

17. What is the primary new capability that ChatGPT has gained?
- A. The ability to translate languages.
 - B. The ability to generate code.
 - C. The ability to search the internet for recent information.
 - D. The ability to create interactive platforms.
18. All of the following are true about the ChatGPT's new search feature EXCEPT _____.
- A. It has been combined with other features and platforms.
 - B. It understands natural language input from users.
 - C. It can provide users with up-to-date information on various topics.
 - D. It allows ChatGPT to find information that is not limited to training data.
19. Which of the following best summarises paragraph 4?
- A. Despite making occasional inaccuracies, ChatGPT has shown significant progress.
 - B. ChatGPT has become more powerful than before, but it is still far from perfect.
 - C. Although it has been upgraded, ChatGPT is still too unreliable for tourists to use.
 - D. Even when ChatGPT has improved, many people still decide not to trust its results.
20. Which of the following can be inferred from the passage?
- A. Public pressure will soon force OpenAI to make the new search feature fully available for all users.
 - B. Competition between tech companies to develop the best AI web searching tool will continue.
 - C. ChatGPT search function is the least effective at recommending travel destinations.
 - D. AI language models mostly provide users with information that are completely fabricated.
21. Where in paragraph 1 does the following sentence best fit?
- "This has caused problems related to the accuracy and reliability of information"**
- A. [I]
 - B. [II]
 - C. [IV]
 - D. [III]
22. Who will initially have access to ChatGPT's new search feature?
- A. Only developers at OpenAI.
 - B. All users, regardless of subscription status.
 - C. Only free users who are logged out.
 - D. Paying customers.
23. The word "**rich**" in paragraph 1 can be best replaced by _____.
- A. varied
 - B. lively
 - C. heavy
 - D. strong
24. Which of the following best paraphrases the underlined sentence in paragraph 3?
- A. Inspired by their competitors' products, OpenAI developed their latest AI-based searching tool.
 - B. Losing to competitors like Google, OpenAI hopes to catch up with its new AI assistant.
 - C. OpenAI is the latest competitor in the area of AI-powered search engine development.
 - D. Now that OpenAI has released an AI search assistant, other tech companies are doing the same.
25. The phrase "**free from**" in paragraph 4 is OPPOSITE in meaning to _____.
- A. be required to
 - B. be vulnerable to
 - C. be controlled by
 - D. be damaged by
26. The word "**it**" in paragraph 3 refers to _____.
- A. interface
 - B. function
 - C. language

Read the following passage about urbanization and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions from 33 to 40.

There are thousands of animal species on our planet, each uniquely adapted to its environment. However, in the past century, human activities have caused many animals to become endangered. According to the International Union for Conservation of Nature (IUCN), around 40% of all animal species are now at risk of extinction.

One example is the Sumatran orangutan, which lives in the rainforests of Indonesia. Deforestation has destroyed much of their habitat, leaving them with fewer places to live. Moreover, illegal **poaching** for the pet trade continues to threaten their populations. These factors have caused the number of Sumatran orangutans to decrease by 80% over the past 75 years.

Another case is the polar bear, whose survival depends heavily on the existence of sea ice. Due to global warming, the Arctic ice is melting, making it harder for polar bears to find food and build dens for their young. As a result, **their** population is also in decline.

Efforts are being made to save endangered animals through conservation projects. Wildlife reserves, such as national parks, provide protected environments where animals can live without the threat of human **interference**. Additionally, laws against poaching and illegal hunting are being strengthened in many countries. Technology, such as GPS tracking devices, is also being used to monitor endangered species and prevent illegal activities.

33. Which of the following best paraphrases the underlined sentence in paragraph 4?
A. There are no conservation projects carried out to protect endangered animals
B. Conservation projects are being carried out to protect endangered animals
C. These are the last projects to protect endangered animals.
D. Technology should be regarded as the last effort to save endangered animals
34. What can be inferred about the polar bear's future if global warming continues?
A. They will adapt to the warmer climate.
B. Their population will continue to decline.
C. Their numbers will stabilize.
D. They will migrate to other regions.
35. In which paragraph does the author discuss a modern solution to help endangered animals?
A. Paragraph 3
B. Paragraph 2
C. Paragraph 1
D. Paragraph 4
36. In which paragraph does the author mention the reasons leading to the decline in the number of a kind of bear?
A. Paragraph 1
B. Paragraph 4
C. Paragraph 3
D. Paragraph 2
37. According to the passage, which of the following is NOT mentioned as a reason why animals become endangered?
A. Illegal hunting
B. Natural disasters
C. Deforestation
D. Climate change
38. The word "**their**" in paragraph 3 refers to _____.
A. Arctic ice
B. dens
C. polar bears
