Viet Nam Likely to Face Extreme Weather Conditions by 2050

Viet Nam is likely to continue facing extreme weather conditions such as higher temperatures, lower summer rainfalls, stronger **storms**, and rising sea levels from now to 2050. Temperatures in northern Viet Nam will rise by between 0.83 degrees Celsius by 2050 and continue its uptrend during the late 21st century. Summer rainfall will decline in most areas. Meanwhile, storms may become rarer but fiercer, causing possible flash floods and landslides in flood-prone areas of northern mountainous, central and central highland provinces. The forecasts suggest sea level rises of 100mm - 400mm along the entire Vietnamese coast by the end of the 21st century, affecting marine biodiversity and coastal communities. The experts emphasize the unpredictability of climate change and its potential impacts to create a variety of dangerous extreme weather events in the future.

To raise the public awareness of climate change impacts, the Vietnamese government urges concerned agencies to work together on devising worst-case scenario models and responses by 2030 and calls on international experts to further support Viet Nam in climate change adaptation. Climate change is a real threat to Viet Nam's socio-economic development. If sea levels rose one meter, five percent of the country's land, eleven percent of its population and seven percent of **its** farmland would be affected.

Question 29. By 2050, Viet Nam continues facing all of these extreme weather conditions EXCEPT _____.

- | | |
|---------------------------|----------------------------------|
| A. higher temperatures | B. storms reaching record levels |
| C. lower summer rainfalls | D. rising sea levels |

Question 30. Sea level rises along the entire Vietnamese coast by the end of the 21st century will _____.

- A. cause certain flash floods and landslides in flood-prone areas
- B. make temperatures in northern Viet Nam rise until 2050
- C. make storms become rarer but fiercer in the near future
- D. have impacts on marine biodiversity and coastal communities

Question 31. To experts, they _____ to predict exactly the model of the climate change and its potential impacts.

- | | | | |
|---------------|---------------|----------------|------------------|
| A. are unable | B. are likely | C. are certain | D. are surprised |
|---------------|---------------|----------------|------------------|

Question 32. Viet Nam needs _____.

- A. to recognize Viet Nam's socio-economic development in the future
- B. to calculate sea level rise, loss of farmland, and rise in population by 2030
- C. to raise people's awareness of climate change and to ask for foreign help
- D. to recognize the percentage of farmland which would be affected by its population

Question 33. The word "worst-case scenario models" in the last paragraph is closest in meaning to _____.

- A. the worst scenes that could occur
- B. the worst climate change impacts that will happen
- C. the worst possible things that could happen
- D. the worst unpredictability of climate change

Question 34. What does the word "**its**" refer to?

- | | | | |
|--------------|----------|-------------|------------------|
| A. Vietnam's | B. sea's | C. threat's | D. development's |
|--------------|----------|-------------|------------------|

Question 35: What is synonymous word of "storm"?

- | | | | |
|--------------|------------|-------------|-------------|
| A. hurricane | B. drought | C. disaster | B. pandemic |
|--------------|------------|-------------|-------------|

THE ASEAN UNIVERSITY NETWORK

It is clear that the Association of Southeast Asian Nations, or ASEAN, established in 1967, has achieved remarkable progress in strengthening the ties and promoting cooperation among countries in Southeast Asia, especially in terms of cultural, economic, and social collaborations. However, it was not until the Fourth ASEAN Summit in 1992 that cooperation in the fields of higher education and human resource development became the point of attention of the ASEAN leaders.

The idea was later developed into the ASEAN University Network (AUN). The network was founded in November 1995 with the original number of 13 universities in ASEAN member countries. After the enlargement of ASEAN by the ASEAN Charter in 1997 and 1999, the AUN membership increased to 20 member universities, with the addition of two universities from Myanmar, three from Laos, Malaysia, and Cambodia, and two from Indonesia.

The main objective of the AUN is to strengthen the **existing** network of cooperation among universities in ASEAN by promoting collaborative studies and research programmes. Furthermore, the AUN attempts to promote cooperation and solidarity among scientists and scholars in the region and to develop academic and professional human resources as well as to spread scientific knowledge and information among the universities in the region.
