2026

If you ask a hundred people to look into the future, you will probably get a hundred answers. But two major themes seem to **emerge** from almost every prediction made. The first is variety in every aspect of our lives.

We'll probably be living in what futurologists have called a 'multi - option society'. You may be married with 2.2 children, but this won't be the norm any more. It will simply be one of a number of choices, along with living in groups and living alone. The other huge influence on our lives will be micro technology - computers and telecommunications. Take work, for instance, factories will be run largely by robots, so they'll be cleaner places for the few people who work in them. Offices, too, will go electronic with the result that paper will almost completely disappear. More people will work from home at computers linked to a head office. Their homes may even be turned into 'electronic cottages', with Mum, Dad and even the children all sharing one or maybe two jobs.

18. In 2026, it will probably true that _____.

- A. people will work longer hours
- B. people will enjoy more new forms of entertainment
- C. there will be no tasty food
- D. the weekends will be longer

19. It can be inferred from the text that _____.

- A. a hundred people were asked for opinions about the future
- B. a hundred people surveyed answered differently about the future
- C. different people tend to have different opinions
- D. people are optimistic about the future

20. The word "**emerge**" in paragraph 3 is closet in meaning to _____.

- A. disappear
- B. discuss
- C. evolve
- D. come up

21. What is true of a "multi-option society"?

- A. You will have to live alone if not married
- B. It will be the norm to get married and have children
- C. You may choose to live with other people in groups
- D. You will be allowed to have no more than 2.2 children

PLASTIC AND THE ENVIRONMENT

Plastic is a material we use every day. The first plastics were made more than 100 years ago from parts of plants. Plastics are now made from oil, coal and natural gas. We are using up these things so fast that the Earth's supplies may run out. Because of this, scientists are investigating new ideas for making plastics from plants such as sweet potato, bamboo and flax.

Things made from plastic can be useful for people but bad for the planet. Some plastics can last for a long time without wearing out, and can be difficult to get rid of when they are not needed. **They** can remain in rubbish dumps called landfill sites for hundreds of years. Landfills can be smelly, ugly, and harmful to our planet.

Recycling is a good way to get rid of unwanted plastics. Recycled waste materials can be used again to make new products. This can be difficult as different types of plastic need to be recycled in different ways. Some kinds of plastics can be melted down and used to make new things such as bags and bottles. Others can be made into fibers (strands of material) for clothing.

Another way to protect the environment is to use canvas bags for shopping rather than plastic ones. A lot of plastic objects can also be reused. Plastic bottles can be refilled many times, rather than throwing them away once they are empty. Unwanted plastic goods such as CDs and toys can be sold or given away to charity shops.

18. According to the passage, which plant can't you use to make plastics?

- A. bamboo B. carrot C. sweet potato D. flax
